

URINE *Away*™

Pet Urine Eliminator

The solution for pet urine odor and stains.

With urine odor and stains out of the way, everyone is happy.

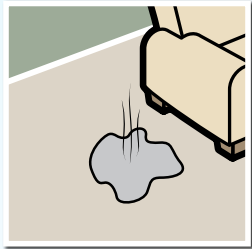

Urine Away™

The fast, easy,
permanent solution.

Trying to get rid of urine stains and odors can be frustrating.

Based on consumer reports, 9 out of 10 urine stains are first treated with a detergent.

When the odor returns, pet owners typically try an enzymatic urine remover. But most pet owners don't realize soap and detergents inactivate the enzymes, which leads to product failure.

The odor comes back again, and the frustration continues.

Urine Away eliminates frustration because it works no matter what detergent has been used before.

Eliminate the odor. For good.

- Permanent resolution from pet urine odor and stains
- Fast, easy and effective
- Works at the molecular level
- Safe, non-toxic and non-irritating
- Biodegradable

Urine Away **permanently** eliminates odors in 4 ways.

All urine odors are caused by molecules that emit a vapor. Many products attempt to “control” odors, but none of them eliminate the odors like Urine Away:

- 1 BONDS** within seconds of application to neutralize odors for good.
- 2 ABSORBS** to permanently eliminate the smell.
- 3 COUNTERACTS** odors at the molecular level.
- 4 PREVENTS** odors after initial application.

Nothing works like Urine Away

- Effectively eliminates the odor no matter what has been used in the past.
- Proprietary triple-action formula keeps odors from coming back.

Non-toxic, however, keep out of reach of children. For external use only. Spot test in inconspicuous area before using.

It's easy to use Urine Away.

- Remove excess urine from area being treated.
- Apply a liberal amount of Urine Away directly to the area of urination.
Good rule: apply an equal amount of Urine Away to the amount of urine deposited.
- Let soak in and dry. To work successfully, Urine Away must come in direct contact with the entire urine-soaked area.

NOTE: Urine can spread in sub-flooring and carpet padding; and wick up vertical surfaces.

Sizes:

- 8 oz Spray bottle for walls and furniture
- 16 oz Soaker bottle for carpets and upholstery
- Gallon size for refills

From the manufacturers of Feliway® and Adaptil® Help eliminate the odor and stain with Urine Away and then use Feliway or Adaptil to help reduce or eliminate the behavior.
