

Improving Ear Hygiene:

- A dog's ear is deep and curved.
- Dirt, wax, and excess moisture often accumulate.
- If not routinely removed, this accumulation can compromise ear health.
- Clean your dog's ears on a regular basis with Oti-Cleans Otic Cleansing Solution.
- Oti-Cleans gently removes dirt, moisture, and excess wax.
- It's clear, nonirritating and helps reduce ear odor.

How to use Oti-Cleans:

- Apply to ear liberally.
- Gently massage base of ear.
- Put cotton ball over fingertip and wipe outer ear clean.

- Let dog shake out excess.
- Clean outer ear again with dry cotton ball.
- Repeat as necessary.

What to look for before or during routine ear cleaning:

- "Foxtails" or other foreign objects in the ear.
- Redness or irritation of ear.
- Unusual pain or tenderness.
- Unpleasant odor or discharge.
- Excessive wax or debris.

Contact your veterinarian if any of these conditions exist.

FOLLOW YOUR VETERINARIAN'S INSTRUCTIONS ON THE USE OF OTI-CLENS.
